Trash Rules and Guidelines

In an effort to create a clean and healthy community, these rules provide guidance on how residents should dispose of their household waste and ensure that the streets and public spaces are kept free from litter and debris.

1. **Trash pickup:** Trash pickup is once a week, and residents are required to place their trash in the designated City of Tallahassee container placed by the street before 6am on the pickup day which is **Tuesdays.** (please note that pickup days are usually delayed by a day on major holidays).

2. **Recycling:** Recycling services are also available, and residents are encouraged to separate their recyclable items from their waste.

3. **Yard waste:** Yard waste, including tree branches, grass clippings, and leaves, should be separated from regular waste and recycling. The yard waste should be placed in separate containers or tied neatly in a small bundle for pickup. Wet trash such as food waste, grass clippings, and garden debris should be put in sealed bags or containers to prevent odors and the attraction of pests.

4. **Prohibited items:** Certain items are not allowed to be placed in the trash container, including hazardous waste, electronics, and bulky items such as appliances and furniture. Residents must make other arrangements for the disposal of these items.

No tires, glass or mirror items should be placed within the bulk trash.

5. **Penalties:** Violations of the trash rules can result in penalties. Repeated violations can lead to disciplinary action from the Association.

6. **Litter:** No throwing trash on the ground: It is important to keep the community clean and pleasant to live in. Do not throw trash on the ground. This can attract pests and create unwanted odors.

It is essential for residents of Hartsfield Woods Homeowners Association to follow these trash rules to maintain a clean and healthy community environment. These rules ensure that the household waste is disposed of appropriately and the streets and public spaces are kept free of litter and debris. By working together, residents can help make our neighborhood a great place to live.
